

## Moulded PTFE SHEET Gaskets

Code: KXT PMS

### PTFE Moulded Sheet

We are prominent manufacturer and supplier of quality **PTFE Moulded Sheet**, we maintain quality standard in manufacturing these sheet. The PTFE Sheets available with us are available in all types of virgin and all filled grades. These sheets are available in two types that are ptfе sheet and ptfе skived sheets.

#### Benefits of PTFE Sheets:

- PTFE Sheet has withstand temperature from -200 oC - +250 oC
- Excellent Insulating properties
- Molded PTFE sheet has the lowest coefficient of friction of solid materials
- It has the best electrical properties of all plastics
- PTFE Sheets exhibit astonishing chemical resistance

#### Usage:

- PTFE sheets and films are used in a wide variety of industries including heavy electricals, electronics (for circuit boards), pumps and valves. We capable of achieving global standards of tolerance on skived tapes, sheets and films.

#### Specifications:

Standard Size	1.5 mm Thk to 50 mm Thk
Grade	Virgin
Temperature Range	-200 Deg.C to + 250Deg.C
Tensile Strength	2,500-4,000 PSI
Gravity Between	2.13-2.24
